## OUR GUARANTEE

At Correctional Industries, we stand by the quality of our design and space planning services. In order to ensure your satisfaction, a purchase order will not be processed until you have given final project approval. We will fix any mistakes, overages or shortages, should they occur. We guarantee that you will receive your project as intended without incurring unauthorized expenses.

## Computer Aided Design

### CAD Services

If you need faded blueprints redrawn, floor plans re-configured, or office layouts designed, Correctional Industries can create drawings and electronic files to fit your individual needs. Utilizing the latest version of AutoCAD® software, CI's Computer Aided Design Services provide you with a quality product priced competitively and delivered on time. Call today to discuss your drafting and design requirements!

### Layout Drawings

Using computer generated design, CI can re-configure existing space, providing an accurate visual layout of 'intended' surroundings. With an overhead floor plan and 3-D view, you can see where new offices will be located, what each room will look like, and what new or additional furniture is required - all before you make the initial investment. This avoids costly mistakes and allows for adjustments and changes before any purchase orders are generated.

### Copy Drafting

Accurate and flexible data is essential in today's computer driven world. Let us help you convert your outdated hard copy blueprints into an electronic format that will help you organize and plan.

CI can convert the following:

- Building plans
- Engineering drawings
- Layout boundary lines of pipe, gas, cable
- City and County maps

We can also create specialized drawings to meet your additional needs, such as product design, emergency evacuation routes and layout design. All of our completed work is checked for accuracy and provided in an electronic format with a complete drawing block library. Drawings can also be plotted at various sizes to meet your hard copy needs. Correctional Industries' CAD Services is here to help you move forward.

### Scanning and Indexing

Do you spend hours trying to track down your blueprints? Do you find a need for more than one copy of a manual? We can help by scanning blueprints, manuals and other materials into a PDF format. Locating and sharing drawings becomes a breeze, and printing a new copy of a worn out manual is just a click away!

Benefits of Scanning and Indexing:

- Access records in seconds
- Improve archives
- Significant cost savings
- Better tax assessment
- Edit drawings in seconds

Converted drawings are saved in various electronic formats, which includes DWG format. In our fast paced world where time is money, an electronic document can save you valuable minutes when your deadlines are looming. Please contact your Account Executive today for a free estimate.
