

MONROE CORRECTIONAL COMPLEX

FACT SHEET

ABOUT THE FACILITY

The Monroe Correctional Complex (MCC) is the second largest prison in the state.

MCC is comprised of five facilities, with 105 buildings on 365 acres.

Washington State Reformatory Unit (WSRU) - 1910

- Total capacity: 772 beds, current capacity: 35
- Medium/MI3 custody beds
- WSRU comprises two large living units: cell block A, C/D, and a smaller living unit 3A Unit
- Provides inpatient hospital services, outpatient services and a dialysis unit used by other correctional facilities in the state
- Five Extended Family Visit mobile homes allow for visits with family/friends for the complex
- In 2021, WSRU B, C and D units were warmed-closed due to statewide bed consolidation efforts. A-Unit was left operating with limited capacity, housing the population that needed specialty medical care and access to the inpatient unit, dialysis unit and significant local hospitals. A-unit was also warmed-closed in 2024, and the population was moved to 3A Unit. A/B/C/D Unit remain operable and ready for use if needed.

Twin Rivers Unit (TRU) - 1984

- 795 capacity
- Medium/MI3 custody levels housed in four living units
- TRU incarcerated population includes, but is not limited to, individuals that require Safe Harbor or Protective Custody and individuals enrolled in the Washington State Sex Offender Treatment and Assessment Program (SOTAP)
- In addition to Correctional Industries and Class III Work Programs, TRU offers more than 50 programs: Yoga, Beekeeping and the Summit Assistance Dog Program, which incarcerated individuals train service dogs

Minimum Security Unit (MSU) - 1997

- Current Capacity Minimum Custody (MI2-Camp) 350
- Two 130-bed living units and one 90-bed mental health unit. One of the units was warmed-closed due to statewide bed consolidation efforts
- MSU Houses short-term (6 years or less to serve) incarcerated individuals
- The Mental Health Unit operating through the Crossroads Program allows incarcerated individuals with high mental health needs to transition through lower levels of custody by adopting and accepting more responsibility for managing their mental health
- MSU incarcerated individuals work on supervised Community Work Crews (CWC) providing general labor such as landscaping, painting and highway cleanup to several cities/ communities close to Monroe; they can also be used to support county emergency management

16550 177th Ave SE, Monroe, WA
