January 5, 2021

TO: All SCCC Staff
FROM: Dan Van Ogle, Incident Commander
SCCC Incident Command Post
Subject: COVID-19 Update

As this pandemic continues we are all tasked with challenges, and the incident is very fluid and changes occur quickly. As an update, all COVID-19 recovered incarcerated individuals have been moved from the upper education alternative housing area. This area will be cleaned and prepped for future use. Staff resources will be deployed to other posts for now to help with staffing plans.

We continue to use the H-1 living unit, gym, visit room, and the Correctional Industries (CI) area as alternate housing areas for positive COVID-19 cases. As these individuals reach the recovered phase we are moving them out to general population units and trying to house them with other COVID-19 recovered individuals.

The Testing Team continues to [test general population individuals](#) who have not tested positive for COVID-19 once every seven (7) days to effectively monitor this population and treat them appropriately.

Engineering, food service and CI will be increasing their workforce from an approved list of COVID-19 recovered individuals that is reviewed by Medical. Selected individuals will be notified and placed on the callout. These individuals will need to use Hub1.

The Medical Team is tracking all individuals on isolation and quarantine and plan to effectively communicate these for each unit and tier. These communications will be provided to all staff along with an updated cohorting schedule.

Thank you for all your hard work and continued dedication to the job. I am grateful for the sacrifices you have made, hours spent away from your families and stress you have endured during this pandemic.
