October 1, 2021

TO: All SCCC Staff

FROM: Rob Schreiber, Incident Commander
SCCC Incident Command Post

Subject: **Weekly COVID-19 Update**

I am pleased to announce Headquarters EOC has granted permission to remove G Unit from Limited Area Outbreak status. Testing for Incarcerated Individuals affected have returned with negative results.

Visitation for G Unit has returned to normal. Notification was made to visitors and posted to the public website.

F Unit South is now unoccupied and extra posts have been eliminated.

As a reminder to staff, if you identify an individual with symptoms, notify medical, Shift Commander, and the ICP immediately.

Even if you have received the vaccination and/or had COVID-19 greater than 90 days ago, you are required to participate in weekly PCR testing. Only staff members who have tested positive for COVID-19 less than 90 days ago are excluded from testing.

Thank you to all staff for your commitment to working through this and helping to keep our facility safe. It has been a rough few weeks and I greatly appreciate the dedication and determination you all have exhibited in efforts to combat the spread during the Limited Area Outbreak.
