WA DOC COVID-19 ACTIVE/PASSIVE SCREENING QUESTIONNAIRE

This will be updated as the CDC and WA State Health Department’s information on COVID-19 continues to change.

Your health and well-being are of the upmost importance and we are taking measures to keep the facility/office a safe environment for employees as well as the individuals under our charge and the public. Therefore, anyone coming into the facility/office will be screened and part of our screening process will include taking their temperature and asking the following questions.

1. Do you have any of the symptoms below that are not caused by another health condition?
   - Fever or chills
   - Headache
   - Cough
   - Recent loss of taste or smell
   - Shortness of breath or difficulty breathing
   - Sore throat
   - Fatigue
   - Congestion
   - Muscle or body aches
   - Nausea or vomiting
   - Headache
   - Diarrhea

2. Have you been in close contact with anyone with COVID-19 in the past 14 days?* (Close contact is being within 6 feet for 15 cumulative minutes or more over a 24-hour period; or having direct contact with fluids from a person with COVID-19 with or without wearing a mask (i.e., being coughed or sneezed on).

3. Within the last 10 days, have you tested positive for COVID-19 OR are you awaiting results of a COVID-19 test due to possible exposure or symptoms? (Note: This does NOT include routine COVID-19 serial or rapid antigen testing for asymptomatic individuals)

4. Within the past 14 days, has a public health or medical professional told you to self-monitor, self-isolate, or self-quarantine because of concerns about a COVID-19 infection? (Note: this doesn’t include the continued self-monitoring done as a regular part of your duties consistent with CDC guidance)

If the individual answers YES to any of the questions above OR has a temperature greater than or equal to 100.4, they will be denied access into the facility/office unless determined otherwise by a designated DOC medical professional. The following question is for the purposes of testing ONLY and will not be used for screening individuals in or out of the workplace.

5. Each Facility/Work Release/Office conducting DOC COVID-19 Staff Serial Testing is expected to ask
   - Have you submitted to a DOC COVID-19 Staff Serial Test within the last seven (7) days? If no, refer to the Serial Testing Protocols outlined in the All Staff memo (Subject Update-Staff Serial Testing for those Traveling to Facilities) with further screening and required testing, if applicable.

6. In the last 14 days, have you traveled out of state using public transportation?
   Please follow the quarantine requirements per CDC guidance. If unable to quarantine via telework, staff are to be referred to their Facility Testing Team and submit to a rapid antigen test upon return to work, prior to start of their shift and again on day three (3) and day seven (7). This testing is consistent with our current testing precautions and is available to staff without having to utilize their own leave. Exemptions from this directive for testing prior to returning to work from out of state travel: Staff who have been fully vaccinated 14-days prior to travel, or Staff who were previously positive/infected with COVID-19 AND have recovered within 90-days of travel.

*Facilities identified as being at critical staffing levels may have essential correctional workers authorized by the HQ Emergency Operations Center to enter the facility under the following guidelines:

- As long as they remain asymptomatic;
- Self-monitor symptoms as outlined in the guidance; and
- Wear a surgical mask at entry and at all times while on facility grounds.
- Follow protocols outlined within the return to work guidance.
