DISRUPTIVE HYGIENE BEHAVIOR RESPONSE PROTOCOL

Disruptive Hygiene Behavior is the intentional smearing of any bodily fluid, including but not limited to feces and urine, on one’s person or anywhere in a cell.

SECTION 1

☐ The offender is identified as engaging in the behavior. Information regarding the incident (e.g., offender name, DOC #, cell location, time protocol started) will be documented in the unit log and on DOC 05-091 Daily Report of Segregated Offender, and the Unit Sergeant will be notified.

☐ Mental Health will be notified, but will not respond immediately. The offender’s mental health records will be reviewed in an attempt to determine if the offender has active mental health issues driving the behavior or if the offender is seeking attention.

☐ If the cell was smeared and no safety concerns exist (e.g., covered window, self-harm occurring, visible open wounds), the offender will be directed to clean the cell and appropriate cleaning supplies, including gloves, will be offered.

If the offender complies, or the offender only smeared on his/her person, go to SECTION 5.

☐ If the offender refuses to clean the cell, the refusal will be documented in the unit log, and the Unit Sergeant will be notified.

☐ The offender will be asked if s/he has any open wounds. If the offender states s/he does, s/he will be directed to show employees the wound(s).

If an open wound(s) exists, go to SECTION 2.

☐ A screen will be placed in front of the cell door and, if necessary, appropriate deodorizers will be applied around the door to cover any odor that may exit into the unit.

☐ The offender will be notified that before s/he receives his/her next meal, the cell must be cleaned and s/he must take a shower.

If the offender complies, go to SECTION 5.

☐ The offender will be checked for compliance during normal tier checks. During each check, the offender will be offered cleaning supplies. Conversations with the offender will be kept to a minimum. Comments regarding the behavior (e.g., smell) will not be made.

If the offender complies, go to SECTION 5.

☐ If the offender has not cleaned his/her cell when the first meal following the behavior is served, s/he will not be provided a meal due to potential health hazards that may exist. The offender will be told why s/he did not receive a meal and will be directed to clean his/her cell. The offender will be notified if s/he does not clean his/her cell by the time the next meal is served, s/he will be removed from the cell.

If the offender complies, go to SECTION 5.

☐ If the offender does not clean the cell by the second meal, the Shift Lieutenant and Mental Health will be contacted. Mental Health employee/contract staff will determine whether they will try and dialogue with the offender.

☐ The Shift Lieutenant will contact the Superintendent/designee or the facility Duty Officer after hours and receive authorization, if necessary, to remove the offender using an entry team.
**DISRUPTIVE HYGIENE BEHAVIOR RESPONSE PROTOCOL**

<table>
<thead>
<tr>
<th>Step</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.</td>
<td>The entry team will prepare and complete its initial brief on video. Once completed, a show of force will be made outside of the offender’s cell.</td>
</tr>
</tbody>
</table>
| 2.  | The offender will be directed to submit to wrist restraints.  
|     | **If the offender complies with restraints being applied, go to SECTION 4.**  
|     | **If the offender does not comply with restraints being applied, go to SECTION 2.** |
| 2.  | **SECTION 2**  
|     | If the offender refuses directives, appropriate steps will be followed by the Team Leader, to include the use of Oleoresin Capsicum (OC).  
|     | The offender will be removed from the cell and offered OC decontamination.  
|     | **If the offender accepts OC decontamination, go to SECTION 3.**  
|     | **If the offender does not accept OC decontamination and his/her behavior is appropriate, go to SECTION 5.**  
|     | **If the offender does not accept OC decontamination and his/her behavior is inappropriate, go to SECTION 4.** |
| 3.  | **SECTION 3**  
|     | The offender will be OC decontaminated using unit protocol, to include clothes being removed/cut off.  
|     | **If the offender's behavior is appropriate, go to SECTION 5.**  
|     | **If the offender's behavior is inappropriate, go to SECTION 4.** |
| 4.  | **SECTION 4**  
|     | Based on the offender’s behavior, unit employees will determine if the offender should be placed in a holding cell or restraint chair.  
|     | **Once the offender’s behavior is appropriate, go to SECTION 5.** |
| 5.  | **SECTION 5**  
|     | The offender will be placed in a shower. The offender will be given a bar of soap and will have 10 minutes to shower. The offender can choose whether or not to take a shower.  
|     | If the cell was smeared and the offender refused to clean it, employees or offender porters that are trained in blood/body fluid cleanup per DOC 670.000 Communicable Disease, Infection Prevention, and Immunization Program will clean the contaminated cell while the offender is in the shower and will dispose of items appropriately.  
|     | The offender will be given clean clothing for any soiled clothing. Once dressed, the offender will be returned to the same cell, if possible.  
|     | The offender will be given a sack lunch or appropriate meal. If a hot meal was served within an hour of the offender becoming compliant, the offender will be given a hot meal. |
