CI MISSION

Correctional Industries is committed to maintain and expand work training programs which develop marketable job skills, instill and promote positive work ethics, and reduce the tax burden of corrections.

CI VISION

Transform lives and increase successful reentry through training and mentoring.

OPTICAL PURCHASE PROGRAM

CI Optical is the approved vendor for incarcerated individuals to obtain prescription eyeglasses. If you are eligible under the Incarcerated Health Plan guidelines, then you may obtain a pair of state-issued eyeglasses through DOC medical.

This catalog shows the only frames, lens types and lens options available.

You must obtain a copy of your current prescription and bring it with you when you order your eyeglasses. You may request a copy from medical if you do not have one. Outside prescriptions (those other than DOC) are acceptable.

If the prescription is expired, a new exam is recommended. Exams are obtained by sending a kite to medical. Exams are typically done once every 2-3 years. Medical does however do a prescreening to determine if you will qualify for a new exam. If you do not qualify for a new exam, you should request a copy of your latest prescription for CI Optical to use.

You must have the funds available to purchase eyeglasses and you may not incur debt or make partial payments for optical orders. Delivery time takes between 4-6 weeks on average from the date the order was paid for. Some specialty orders may run an additional 1-2 weeks. Purchased eyeglasses are subject to the DOC Maximum Allowable Personal Property Matrix limits which currently stands at two pairs of prescription eyeglasses. The two pair limit would include state-issued glasses, glasses from CI Optical or current personal pairs. And one pair prescription sunglasses.

PAYMENT OPTIONS

Family Pay Option:

There are no taxes or deductions taken out when this option is used.

The preferred method of payment for family members is with a credit/debit card. Optical orders will be processed once the credit/debit card payment has been made. Credit/debit card payments must be paid by phone directly to Correctional Industries' accounting office. Family members may call 1-866-580-9933 toll free. Family members must be prepared to provide the following information at the time they make the payment:

- Incarcerated individual's name and DOC number,
- Facility,
- Order number,
- Order date, and
- Order amount

The information listed above will be provided for you on a form at the time of ordering. It is your responsibility (the incarcerated) to pass the information along to your family.

As an alternative method of payment, checks or money orders are accepted. Optical orders paid by check will be processed once the check has cleared, this can delay an order up to two weeks. Check or money order payments must be mailed directly to the following address:

Correctional Industries
P.O. Box 41116
Olympia, WA 98504-1116

There is a \$25.00 fee for returned checks. Checks or money orders must be accompanied with the following information: Incarcerated individual's name and DOC number, facility, order number, order date and order amount.

Inmate Banking Option:

You may use your spendable, medical or savings accounts to pay for eyeglasses.

All payment forms will be provided and are to be filled out only when meeting with the CI Optical optician. Orders will be cancelled for non-payment after 60 days.

ORDER PROCESS

1. Forward your request through the institutional kiosk (CI Optical Mailbox) to be put on call out for an appointment with a CI Optical optician.

For IMU or SOU units without access to a kiosk, you must forward a kite through your counselor to scan and email to: DOCCIOpticalOptician@doc1.wa.gov.

2. CI Optical will have a call out generated. A CI Optical optician typically visits a facility once every 4-6 weeks.
3. You will report to the call out and must bring a copy of your eyeglass prescription with you.
4. A CI Optical optician will assist you in making the best choices for your needs in both frame and lens selection.
5. Payment forms will be provided to you to give to your counselor for processing or to pass information on to your family for payment. Do not submit any payment forms prior to meeting with the optician. Signatures from you and the CI Optical optician are required.
6. Upon payment approval, the Business Office will notify CI Optical to process the eyeglass order.
7. When the order is complete, CI Optical will have a call out generated for you to receive your new eyeglasses.
8. You will report to your call out and have your eyeglasses fitted by a CI Optical optician.

ORDER PROCESS FOR CONTACT LENSES

There are two approved methods for ordering contact lenses:

1. 1-800-contacts is an approved vendor, and your family may place the order and have them sent to you through property for dispensing; or
2. Order through CI Optical. Forward your request through the institutional kiosk (CI Optical Mailbox) to be put on call out for an appointment with a CI Optical optician. You will need a valid contact prescription to present to the CI Optical optician. Your prescription would include the prescribing doctor's name, phone number, license number, date of exam and expiration date as well as contact model with powers, base curves, and lens diameter.

CI Optical will have a call out generated. A CI Optical optician typically visits a facility once every 4-6 weeks.

Contacts are not payable using your savings account. Payment may be made using your spendable account or family may pay directly to CI.

DOC will perform contact lens exams through medical only if the optometrist deems it a medically necessary item. In that case, medical will order the contacts using the incarcerated health plan.

All other contact exams are your responsibility and at your cost.

When a prescription has expired, a new exam is needed. You may elect to pay for an off site escorted medical trip for a contact lens exam. Ask your local staff what would be needed to do this if you are interested.

WARRANTY

It is the policy of CI to provide its customers with products and services that conform to their specifications and quality requirements. CI's goal is to achieve a constant high standard of quality while maintaining economical operations.

All CI Optical products are covered by a limited warranty as follows:

- Lenses are warranted for 90 days against manufacturer defect only. Lenses are not warranted against scratches or non-defective breakage.
- CI Optical frames are warranted for 90 days against manufacturer defect only.
- Reworks due to doctor errors are provided at no cost for the first rework.
- Dispenser and lab errors are reworked at no cost.

Progressive non-adapts are warranted for 60 days. If you are unable to adapt to the progressive style lens, CI Optical will allow a one-time remake of the lenses into either single vision, bifocal, or trifocal lenses at no charge. There is no refund of the difference in price paid between the initial progressive order and the style of the remade lenses.

ADJUSTMENTS, REPAIRS AND REPLACEMENTS

Adjustments or repairs:

Following the initial fitting at the dispensing of the eyeglasses, any further adjustment will incur a \$4.00 charge.

Minor repairs such as missing screws or nose pad replacement will also incur a \$4.00 charge. Adjusting the frame after a minor repair is done at no additional cost.

For other issues such as broken frames or lenses not covered under warranty, full fees for replacements will need to be paid before work is started.

Replacing items not under warranty:

If a frame is broken, a complete new pair (frame and lenses) may need to be purchased. This is due to sizing variances in the product.

Replacing old, scratched or damaged lenses:

New lenses may be ordered for CI Optical supplied frames. The frame would need to be turned in at the time the order is placed. CI Optical will not make lenses without the frame being present in the lab and the frame must be in good condition to use.

PRICING

Single Vision Base Package:	
Tier 1 frame	\$60.00
Tier 2 frame	\$80.00

Bifocal Base Package:	
Tier 1 frame	\$70.00
Tier 2 frame	\$90.00

Trifocal Base Package:	
Tier 1 frame	\$80.00
Tier 2 frame	\$100.00

Progressive Package:	
Tier 1 frame	\$155.00
Tier 2 frame	\$175.00

* Only available with a doctor's prescription.

DEFINITIONS

CR39 lenses are the industry standard plastic lenses.

Polycarbonate lenses are thinner and lighter weight than standard plastic. They are impact resistant, scratch resistant, and have UV protection built in. Typically for prescriptions +/- 2.00 or higher.

High index lenses are the thinnest and lightest weight lenses. They also provide UV protection. Typically for prescriptions that are +/- 5.00 or higher.

Photochromic lenses change color going from inside to outside. They help reduce eyestrain and glare in the sun and provide protection from harmful UV rays.

Polarized photochromic lenses are the best option for sun protection. They also change color from inside to outside but get darker than standard photochromic lenses providing better sun protection. The polarization effect provides better clarity by reducing glare helping you see better.

Polarized sunglass lenses reduce reflected glare from the sun, and surfaces such as water, snow, and glass.

Anti-Reflective (AR) coating helps to reduce glare from all sources of light. This reduces eyestrain and fatigue throughout the day. AR coating improves the clarity of the lens helping you see sharper.

Ultraviolet (UV) coating is basically sunblock for the eyes. It is a clear coating that can be added. Photochromic, polycarbonate and hi index lenses already have UV applied.
