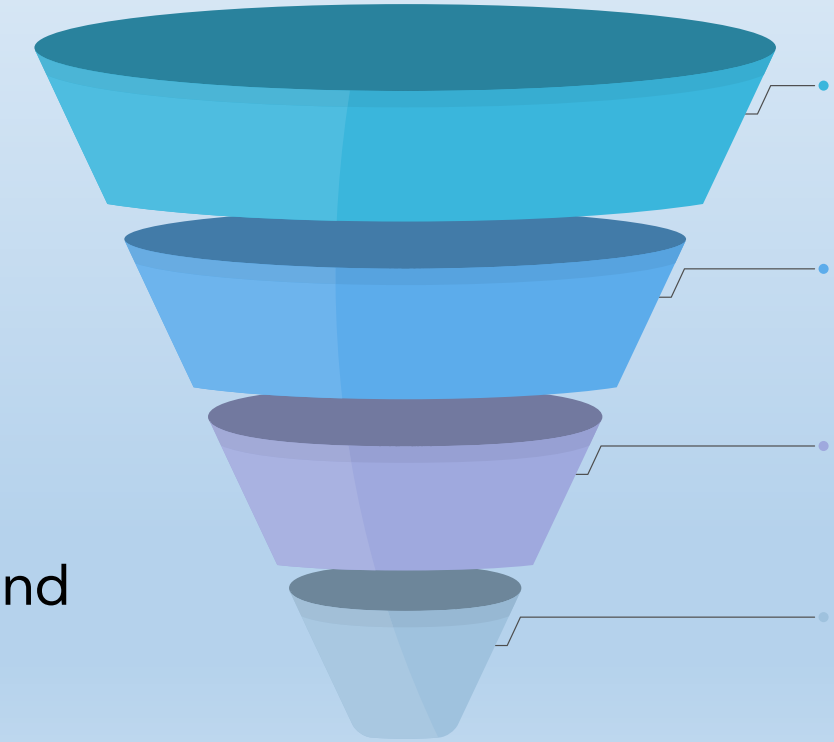
Last Updated: September 16, 2026

The Department offers:

- Residential Programs
- Outpatient Programs

Substance Use Disorder (SUD) treatment provided is:

- Clinicians are certified DOH SUDP
- Evidence-based
- Gender Responsive
- Trauma Informed
- Provided by a contracted vendor and DOC staff



HS-SRU Treatment Services

Residential/Therapeutic Communities (TC ASAM Level 3.5)

Residential programs utilize the Therapeutic Community (TC) model at 6 prison sites. TC is an evidenced and phase-based, trauma-informed level of care, TC is the most intensive form of treatment available within DOC prison facilities and community settings.

High Intesity Outpatient (HIO—ASAM Level 2.5)

IDT meets four days a week for 12 weeks, 16 hours per week. The curriculum consists of anger management, vocational skills, and positive change strategies to assist in overcoming self-defeating behaviors.

Intensive Outpatient (IOP—ASAM Level 2.1)

Similar to IDT, IOP meets four days a week, but for nine hours per week for 12 weeks. Although the least intensive IOP still includes monthly progress reviews and provides the essential core treatment elements designed to remove barriers to recovery and reduce recidivism such as: defense mechanisms, relapse prevention, anger management, generalized alcohol and other substance education, and more.

What is the financial cost to the DOC of residents' drug use? Is there a way to use some of that money to help people recover in the earlier stages of their incarceration? Or is that already being done

- WA DOC contracts with agency that is well versed in SUD treatment, and the contract is based on a fee for service platform, much like agencies in the community who would bill insurance companies. Rates are based on clinical components
- Rates for contracted services:
    - Assessment: $155 per assessment
    - Residential treatment is a cost per day at 19.93 per individual per day
    - We currently are working on several projects to start engagement with incarcerated individuals earlier.

Atlas

- Launched at all sites July 2026
- ~4,520 participants enrolled in Atlas
- WA DOC onboarding video

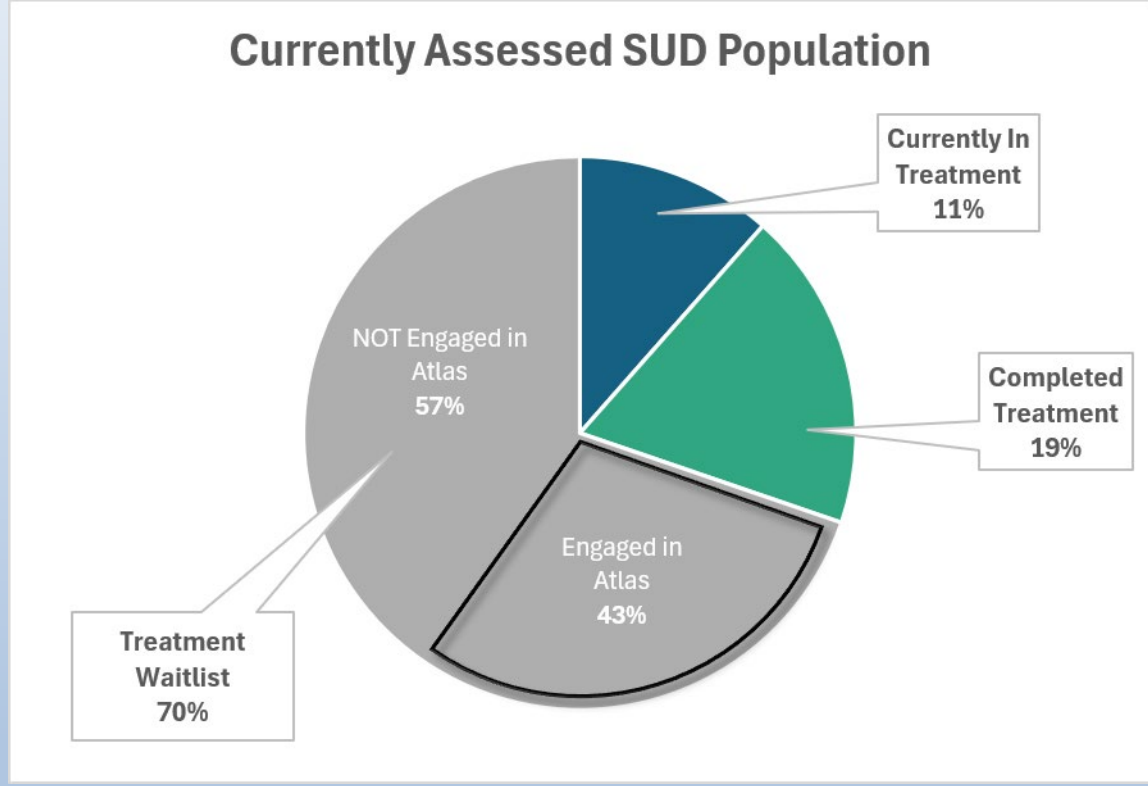
SA Treatment & Atlas Engagement

Total Assessed/Diagnosed Population	**4,972**	
Currently In Treatment	**575 (11%)**	
Completed Treatment	**934 (19%)**	
Treatment Waitlist	**3,469 (70%)**	
	1,484 (43%) Engaged Atlas	1,979 (57%) No Atlas

Currently Assessed Population:

- 11% are currently in treatment
- 19% have completed treatment
- 70% are on the treatment waitlist
    - **Of those on the treatment waitlist**
        - 43% have engaged with Atlas at least once
        - 57% have never engaged with Atlas



Atlas use

Correctional facilities often lack the resources or infrastructure to provide comprehensive care. Limited funding, overcrowding, and a shortage of trained behavioral health professionals exacerbate the problem, leaving many individuals without the support they need

Early Engagement

Early intervention is critical for preventing the escalation of mental health and substance abuse issues. Atlas will provide early interventions for those who screen positive for behavioral health issues. It can also be used as orientation to those entering the prison setting

Opportunities

- Atlas as main curriculum for SUD programing
- Adjunct to MH programing
- MOUD education
- Reentry support

Peer support

- Combining Atlas interactive journaling with Peer Support;
- Use of Atlas as an educational tool
- Reentry education and support
- Changing the culture and adding nonjudgemental support
- Begins are reception

What's the current staffing level of licensed treatment providers relative to demand?

Per Department of Health Website:

Approximately 2,712 Behavioral Health Certified agencies:

This does not include the numerous State: County, City and other agencies that hire DOH certified substance use professionals

- Per Department of Health Website
- There are approximately 4300 certified substance use professionals

- 60 DOC staff
- 32 Contract staff

Thank You
